DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: in line 8, "selective" should be changed to --selectively--. Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6-8 and 18 of U.S. Patent No. 6,588,636. Although the conflicting claims are not identical, they are not patentably distinct from each other because the mount assemblies on each carrier assembly are similar in scope and subject matter.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 3, 4, 7, and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 3 and 4, the first segment angled between 0 and 90 degrees is indefinite, since an angle of 0 will not cause the hitch elements to be engaged on different spatial planes.

The dependent claims not specifically mentioned are rejected as being dependent upon a rejected base claim, since they inherently contain the same deficiencies therein.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Powell.

Powell discloses an accessory carrier assembly (10) comprising:

- A first segment (12) having a first aperture;
- A second segment (14) having a portion fitted on the first aperture;
- An accessory carrier element (26, 38) selectively engageable (via 20, 24, 25) with either the first or second segment;
- The accessory carrier element is a bicycle rack;
- The first segment is angled between 0 and 90 degrees from the second element, to the same degree claimed;
- At least one support member (20) connecting the accessory carrier element and the first or second segment; and
- The support member comprises a pair of spaced plates (29, 31).

Conclusion

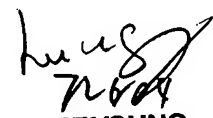

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bruhn, Peters, Van Dusen, Klemetsen, Didlake, Darby, Hardin, Heyworth, Julian, and DeWitt are cited for accessory carrier assemblies.
